REBATE PROGRAM

Helping you make the switch to LED and saving energy for our City, State and Nation!

Harlan's Premier Provider

2412 Southwest Ave., P.O. Box 71

Harlan, IA 51537

(712) 755-5182

www.harlannet.com

HMU is an Equal Opportunity Provider

02-02-16

Why have a rebate program?

The intent of this rebate program is to lower your, and HMU's, energy costs.

Electric use in Harlan continues to rise. Commodity as well as transportation costs to bring electricity to Harlan are increasing. When customer demand goes up, we need to meet that demand by purchasing additional electricity at prevailing market prices. This costs all of us more money.

Efficient lighting is designed to lower short and long term energy costs. Investing a little time and energy into lighting today saves money over the long term.

How can one consumer make a difference?

Efficient lighting is a logical complement to energy efficiency. Every small decrease each of us makes adds up to big savings later.

What are some of the savings?

Before you install lighting, review this brochure and rebate form to ensure you meet all rebate guidelines.

If you have any questions, call HMU, 755-5182.
