

May 5, 2023

Harlan Municipal Utilities is asking our customers for their assistance in completing a short survey to classify what type of material your water service line is from HMU to your home or business. The EPA has mandated that all public water systems complete a Lead Service line Inventory of those different materials used to supply water to its stakeholders. To show our appreciation for answering the survey HMU will be entering each location into a drawing for a \$100 credit towards your utility bill. (5 winners - 1 entry per location – must have an active account). Survey must be completed by July 1, 2023. A couple of items you will need to know is when your house was built and have the ability to take a picture to upload the service coming in to your house. Using a cell phone or mobile device is recommended.

Please Click on the hyper link below to complete the short survey.
